SECOND ANNUAL REPORT

OF THE

Committee of Visitors

OF THE

GLAMORGAN COUNTY ASYLUM,

To Her Majesty's Justices of the Peace
Assembled in Quarter Sessions

Held at Cardiff, on Tuesday, January 1st, 1867.

In accordance with the 62nd Section of the 16 and 17 Victoria, c. 97, the Committee of Visitors of the Glamorganshire Lunatic Asylum beg to submit their Annual Report.

At the commencement of the year the number of Patients on the Books amounted to—

Males Females	
Total	
The admissions during the year have been-	
Males	49
Females	41
	contra)
Total	90
	parent
Grand Total	317
	Constitution of the Consti

This number is accounted for in the following manner, viz:-

	Males.	Females.	Total.
Remain in the House	156	122	278
Have been discharged	12	14	26
Have escaped	0	0	0
Have died	13	0	13
	-		
Total	181	136	317
			-

The health of the inmates has been extremely good during the whole year. Though the season has been generally a sickly one, and Cholera has prevailed in the immediate neighbourhood of the Asylum, no case occurred within its walls; and illness of any kind has been almost exclusively confined to the weak and aged Patients.

The buildings are now completed; several of the Day-rooms have been papered and painted, and the whole house is beginning to assume that air of comfort and cheerfulness which is so necessary for the happiness and welfare of its inhabitants.

The Committee have not been able to make arrangements for receiving Patients from other Asylums at such a remunerative price as would justify their entering into a contract during the present high and uncertain rate of cost for provisions, clothing, and other necessaries.

There are now 10 furnished beds unoccupied on the Male side, and 12 on the Female side of the Establishment, with further room for 31 Males and 29 Females, in the event of such increased accommodation being required.

The Committee have appointed Henry T. Pringle, M.B., M.C., Assistant to the Medical Superintendent, and they believe that great benefit will result, both to the Patients and Establishment in general, from this addition to the Staff.

In conclusion, the Committee have the satisfaction of stating that they continue to have perfect confidence in Dr. Yellowlees, the Medical Superintendent, to whose unremitting care and skill the Asylum owes its present state of efficiency. They are also enabled to speak in most favourable terms of the zeal and activity of the Chaplain and other officers of the Establishment.

HENRY LYNCH BLOSSE,

Chairman.

GLAMORGANSHIRE LUNATIC ASYLUM, December 31st, 1866.

REPORT

OF THE

COMMISSIONERS IN LUNACY.

GLAMORGAN COUNTY ASYLUM, Tuesday, 24 April, 1866.

The changes in the Patients since the 19th April, 1865, the date of the last visit of the Commissioners, and their present numbers, are shown by the following tabular statement:—

	Male	Female	Total
Admitted	111	89	200
Discharged recovered	12	13	25
" not recovered	2	• 5 •	2
Died, (all from Ordinary Causes)	7	2	9
Present numbers on Books	141	103	244

The rate of mortality during the year 1865 was only 4.4 per cent. upon the average numbers resident. The sanitary condition of the Asylum is very good. We found only one Patient, a male epileptic, in bed.

We have to report very favourably of the state of the Patients generally, and their quiet, orderly demeanour. With few exceptions, they were free from excitement.

According to the Medical Journal, since the last visit, five male Patients, and one female, have been subjected to mechanical restraint at night, three of the former by means of gloves, to prevent them from tearing their bedding, one for surgical reasons, the fifth as a precaution against his suicidal pro-

pensity, and the female to prevent her from pushing her hand down her throat. The instances of seclusion have been very rare. The Patients industrially employed average 90 in the male, and 88 in the female division.

The attendance at Divine Service in the chapel on the Sunday before our visit, was 171—viz., 93 males and 78 females. Prayers are read daily by the Chaplain in the Dining-Hall.

The periodical entertainments are as follows, viz:—On Tuesday evenings, Singing Class; on Thursday evenings, Dancing and Singing; and on Saturdays, Cricket.

The present supply of amusing publications is very insufficient; but we are informed that £20 has been placed at Dr. Yellowlees's disposal for the purpose. A like sum has been voted for the purchase of framed prints, &c. The reason assigned for the walls of the Day-rooms having been hitlerto left bare and without decorations of any kind is, that the chimnies generally, owing to their faulty construction, smoke. This is a matter requiring an immediate remedy, and has aready, as we learn, been under the special consideration of the Committee of Visitors.

As respects the interior of the Asylum generally, we were disappointed to find that little or nothing his been done since the last visit in the way of painting, coloring, or papering. The corridors and rooms, consequently, present a very bare aspect. These observations apply equally to the main building and the detached Blocks from which all the Patients who occupied them at the time of the last visit, have, for the present, been removed into the main building. This building may now be considered as full—there being only four vacant beds in the male, and two in the female division. In consequence of the preponderance of the number of male Patients over that of the females, two Dormitories, containing together 16 Patients' beds, properly belonging to No. 1 Female Ward, have been appropriated to the men.

In these circumstances, we strongly recommend that a sufficient number of workmen be at once engaged, to complete for occupation, the workshop Block which is calculated to accommodate 52 male Patients. As soon as the necessary painting, colouring, and papering in this Block shall have been finished, we suggest that no time should be lost in carrying out similar arrangements throughout the remainder of the Asylum.

The arrangements for Bathing and the construction of the Baths are very satisfactory. In respect to these, however, we think it desirable that the water should be changed for every Patient, and that the several Baths should be screened off by curtains. Also, that printed Regulations should be hung up in each Bath-room, for the guidance of the Attendants.

We have to report the following improvements since the last visit:—1. The enlargement of the Day-room, and Dormitory above, in Male Ward No. 4, by the removal of two single sleeping-rooms on each floor.—2. The embankment of the River by the labour of the Patients, which will effectually prevent the floods which had been experienced.—3. The trenching the Garden and laying out the grounds, in which much progress has been made.—4. Hand rails and glazed doors to all the staircases.

We are informed that an abundance of carpeting for bedsides has been ordered, and that sixty seats are about to be placed in the Airing Courts, in some of which sunshades are required.

The present Staff of Attendants consists of 10 on the male side and 7 on the female; and we are glad to learn that Dr. Yellowlees has been empowered to increase their wages at his discretion up to £30 in the former, and £16 in the latter division.

At present there are no special night Attendants, but the ordinary Attendants are placed to sleep in several Dormitories.

We have satisfaction in reporting that the Patients of faulty habits are very few in number, there having been, on the night before our visit, four wet beds only in the male, and one in the female division. This, however, does not, in our opinion, dispense with the necessity of regular night supervision, which, as respects cases of epilepsy, and on every account, is most desirable and generally found essential.

In the course of our inspection we noticed a want of blinds or curtains to the windows of the Dormitories, and the upper portions of those of the Day-rooms with a southern aspect.

In conclusion, we trust that the necessity for relieving Dr. Yellowlees of some of his present laborious duties, by the appointment of an assistant medical officer, will shortly receive the favourable consideration of the Visitors.

R. W. S. LUTWIDGE, Commissioners JAMES WILKES, in Lunacy.

ANNUAL REPORT

OF

THE MEDICAL SUPERINTENDENT

FOR THE YEAR 1866.

Gentlemen,

I have the honour to submit my Annual Report for the year 1866, with the usual Statistical Tables.

O- 14 T 1000 41 - A1	Male	Female	Total
On 1st January, 1866, the Asylum contained	132	96	227
And there have been admitted during the year	49	41	90
So that the total number under treatment has been	181	136	317
Of this number, there have been			
discharged	12	14	26
And there have died	13	0	13
So that there remained in the Asylum, on 31st Dec., 1866	156	122	278
	181	136	317

The year 1866 will prove, it is to be hoped, very exceptional in the character as well as in the number of the cases admitted. They include this year many cases of old and confirmed insanity, which have hitherto been kept at home or in Workhouses, and which are now sent to the Asylum for safety or convenience, without any expectation of recovery. Of the 90 cases admitted, no fewer than 62 must be regarded as Incurable.

Twenty-six Patients were discharged during the year. Twenty-two of these, 11 of each sex, had recovered This is a satisfactory result when the nature of the admissions is considered. It is gratifying to find that of the 41 Patients who have been discharged recovered since the Asylum was opened, only two have been re-admitted.

Thirteen men have died during the year, but there has been no death among the females. This is somewhat remarkable, notwithstanding the well-recognised fact that men are more liable than women to the fatal forms of Brain Disease. The proportion of deaths to the average number resident is remarkably small, being only $5\frac{1}{2}$ per cent., whereas the average proportion of deaths in County Asylums is 11 or 12 per cent.

The proportion of curable cases now under treatment is exceedingly small; and it is very lamentable that the chance of cure is often deliberately thrown away before the admission of the Patients. Few things are more sad than to receive a Patient in whose case everything had been at one time favourable to recovery, but whose disease has become confirmed and hopeless through the mistaken kindness or foolish sensitiveness of his friends. They imagined that they could treat him more kindly and carefully at home, or that both he and they would be disgraced if he were sent to an Asylum; and so they did not procure his admission until their hopes and patience were exhausted, and the Patient had become incurable.

It is impossible to exaggerate the importance of early treatment in insanity, and I beg to direct attention specially to Table vii., which conclusively proves its importance. 32 Patients were received during the year who had been insane before admission for some period under six months. Of these, 20 appear to be curable, and 11 are already discharged cured. The remaining 68 admissions, in which insanity had previously existed for a longer period, yield only 8 curable cases, and none of these have yet been discharged.

It seems to be a habit in some Unions to send a lunatic to the Workhouse in the first instance, apparently that the Patient may have a chance of getting over the attack without being sent to the Asylum. Such a course is greatly to be deprecated. The most important time for treatment is lost, for, of course, the arrangements and attendance of a Workhouse make proper treatment impossible, however efficient its officers may be. If the Patient gets well soon, the Union has been saved a little trouble and expense, at a great risk. If he does not speedily recover; and vet does not become violent or destructive, he remains in the Workhouse; where it is but too likely that he will lapse into confirmed insanity, and will be ultimately sent to the Asylum on account of sudden excitement or dirty habits, only when all hope of recovery is past. One such case, thus becoming a life long burden on the Union, which early Asylum treatment_ might have averted, far outweighs the saving on those cases which recover without it, so that on the ground of economy as well as of humanity, the sooner an insane pauper is sent to an Asylum the better.

I am thankful to report that the general health of the Establishment has been, as heretofore, remarkably good. There has been no epidemic or infectious disease. Cholera was very prevalent in the immediate neighbourhood of the Asylnm during the autumn, but happily no case occurred within its walls, and but one case of choleraic diarrhea. So excellent is the general health and condition of the Patients, and so marked the improvement in the condition and appearance of the new cases within a very few weeks after admission, that I have seen no reason to suggest any alteration in the Dietary.

Great improvement has now been effected in the appearance and comfort of most of the Wards. During the early part of the year, the damp walls and smoky chimneys made progress impossible; and the whole House looked bare, dreary, and comfortless. This was its condition when visited by the Com-

missioners in Lunacy in April. These causes of delay and discomfort have now been in a great measure rectified, and the completion of the Wards has been proceeding rapidly. All the Male and one of the Female Wards have now been papered and painted, and the Day-rooms have been made pleasant, comfortable, and cheerful, by the addition of blinds, vallances, pictures, and statuettes. These improvements have been partly effected by the Patients themselves, and are highly appreciated by them. A corresponding and very gratifying improvement is observable in their greater contentment and happiness. The old Patients, who were somewhat disturbed by removal last year, have now settled comfortably in their new home, and their contentment is further promoted by the greater amount of liberty which they can now be permitted to enjoy. As a proof of the increased contentment, and as a result of the greater liberty, the attempts at escape have been much fewer than during last year; none of them have been successful.

The Library is now opened, and the books are regularly issued by the Chaplain. They are a great boon to the more intelligent Patients as well as to the Staff; and they also furnish to Mr. Jones topics and opportunities for conversation in visiting the Wards. Further details as to the Chaplain's department will be found in his Report.

Amusements continue to receive due attention. Music has a prominent place among them, and the Drum and Fife Band is proving a great acquisition.

Out of doors also, there has been satisfactory progress during the year. The Garden and Farm have afforded employment for the working Patients, and have yielded an ample supply of Vegetables. The Airing Courts and general grounds, although of course still new and bare looking, have been greatly improved by additional trees and shrubs, and in summer they were gay with flowers.

Dr. H. T. Pringle entered on his duties as Assistant Medical Officer in September. He is working very zealously in his new

sphere, and has already proved himself a valuable and efficient officer. My daily duties will be much lightened by his help.

My acknowledgements are due to all the Officers for careful attention to duty and harmonious co-operation. Mr. Jenkins continues to discharge the duties of Clerk and Steward very efficiently. In the completion of the Male Wards, as well as in the discharge of his usual duties, Mr. Corson, the Head Attendant, has merited special commendation.

I am glad to report that the various Attendants and Servants have, as a rule, performed their duties carefully and satisfactorily. There is still great difficulty in procuring suitable female Attendants.

In conclusion, I beg earnestly to thank the Visitors for their continued confidence and approval, which are an invaluable support amid much anxious responsibility.

I have the honour to be,

Gentlemen,

Your obedient Servant,

DAVID YELLOWLEES, M.D.,

REPORT

OF

THE CHAPLAIN.

FOR THE YEAR 1866.

Gentlemen,

In presenting my Second Annual Report, I am happy to be able to announce that the state of things in my department has been, on the whole, satisfactory. Since I had the honour of laying before you my First Report, I have had some experience in the management of the Patients, and this has enabled me to discharge my duties with more profit to them, as well as with more satisfaction to myself.

The religious services have been conducted with strict regularity, except on few occasions when I was unavoidably absent through ill health. The Sunday services have been made more attractive by the use of the Harmonium, which the Committee were good enough to grant us. Many of the Patients take part in the service, and join in the responses with a loud voice. Their behaviour during Divine Service has been most pleasing and exemplary; and it is worthy of note, that many of those who are habitually noisy in the Wards, demean themselves in Church with great propriety, thus proving that the sacred character of the building, and the solemnity of public worship tend to produce a very beneficial effect.

The Burial Ground has been consecrated, and the Church duly licensed by the Bishop. On Christmas-day, I administered

the Holy Communion to the Officers, some of the Attendants, and a few of the Patients. Some little difficulty was experienced in preparing Patients for our first Communion; but this will, I believe, be removed, by adopting a more definite plan of action suggested by the Medical Superintendent.

The Library has been fitted up, and furnished with a stock of useful books. Some of these are issued weekly to the different Wards, and I rejoice to find that many of the most intelligent, and best informed Patients read them with interest, and appear to derive benefit from their perusal.

I have frequently mixed with the Patients in their out-door amusements, and taken part in them myself. I have also given my full countenance to their in-door games, with a view of showing those, who entertain conscientious samples as to the propriety of such recreations, that, in my opinion, they are harmless, and do not in any way militate against the teaching of the Bible, to which the objectors invariably appeal as their rule of conduct.

I cannot close my report without acknowledging the kind and valuable assistance, which the Medical Superintendent and Dr. Pringle have, from time to time, rendered me in the the discharge of my duties.

I have the honour to be,

Gentlemen,

Your obedient Servant,

CHARLES JONES, Chaplain.

All Working Patients, both males and females, receive 40z. Bread, 1½0z. Cheese, and ½pt. Beer, as Luncheon.

The Meat is Beef, Mutton, Veal, or Pork, as may be convenient. It is carved by the Attendants in the Dining Hall, and two kinds of Vegetables are always given along with it. Fruit Pies or Puddings are frequently given during Summer.

The Tea is infused in Bulk. The Allowance for each Patient is 10 oz. Tea, and 20z. Sugar per Meal, and 1 pint

of Milk weekly.
